

# CPht Student Immunization Form

Name: \_\_\_\_\_ Date of Birth: \_\_\_\_\_

Reference	Vaccine	Dates				Titer
1	Hepatitis B	/ / MM/DD/YYYY	/ / MM/DD/YYYY	/ / MM/DD/YYYY	OR	/ / MM/DD/YYYY Immune: Yes No
2	MMR (Measles, Mumps, Rubella)	/ / MM/DD/YYYY	/ / MM/DD/YYYY		OR	/ / MM/DD/YYYY Immune: Yes No
3	Polio Circle Type: IPV or OPV	/ / MM/DD/YYYY	/ / MM/DD/YYYY	/ / MM/DD/YYYY	OR	/ / MM/DD/YYYY Immune: Yes No
4	Tdap Tetanus/Diphtheria/Pertussis	/ / MM/DD/YYYY	<b>AND</b> If TDAP date given is more than 10 years	TD Booster Tetanus / Diphtheria		/ / MM/DD/YYYY
5	Varicella (Chicken Pox)	/ / MM/DD/YYYY	/ / MM/DD/YYYY		OR	/ / MM/DD/YYYY Immune: Yes No
6	Tuberculin Test (PPD) <b>(two-step Mantoux)</b> Step 1	/ / MM/DD/YYYY Given	/ / MM/DD/YYYY Read	Test Results: ___ mm	<b>Attention:</b> Prior Positive or BCG Vaccine Patients – See instructions on page 3 below	
	Tuberculin Test (PPD) <b>(two-step Mantoux)</b> Step 2	/ / MM/DD/YYYY Given	/ / MM/DD/YYYY Read	Test Results: ___ mm		

Official Provider Authorization – must include contact information for verification

## CPHT Student Immunization Schedule

Vaccine	Schedule				Explanation
Hepatitis B Recombivax HB, Engerix-B	Day 1		30 Days Later	6 Months Later	Hepatitis B vaccinations are administered on a 0, 1, 6-month schedule *
Or					
Hepatitis B Heplisav-B	Day 1		30 Days Later		Hepatitis B vaccinations are administered on a 0, 1-month schedule *
MMR (Measles, Mumps, Rubella)	Day 1		4 Weeks Later		MMR vaccinations are administered 4 weeks apart
Polio	Day 1		30 Days Later	6 Months Later	Polio vaccinations are administered on a 0, 1, 6-month schedule for adults *
Tdap Tetanus/Diphtheria/Pertussis	Day 1				Tdap vaccination is given once, however a Td booster is required every 10 years
Varicella (Chicken Pox)	Day 1		4-8 Weeks Later		Varicella vaccinations are administered 4-8 weeks apart
Tuberculin Test (PPD) <b>(two-step Mantoux)</b> Step 1	July 27, 2025	Read Within 48-72 Hours			The two-step Mantoux PPD vaccinations are administered 1-3 weeks apart and each vaccination must be read within 48-72 hours after administered. If a positive PPD is received – adhere to CDC guidelines.
Tuberculin Test (PPD) <b>(two-step Mantoux)</b> Step 2		1-3 Weeks Later	Read Within 48-72 Hours		

- Vaccinations are due no later than June 15
- Vaccination can be administered on or after July 27, 2025
- Vaccinations are due no later than July 15
- Vaccinations are due no later than January 15
- Vaccination must be read within 72 hours after vaccination

All **Green** vaccinations can be given on the same day  
 All **Blue** vaccinations can be given on the same day  
 All **Red** vaccinations can be given on the same day

\* 0 refers to the start date of immunizations

<u>Reference</u>	<u>Vaccine Type</u>	<u>Instructions</u>
1A	Hepatitis B	Three doses of Hepatitis B vaccine or laboratory evidence (titer) of immunity.
1B	Hepatitis B	Two doses of Hepatitis B vaccine or laboratory evidence (titer) of immunity.
2	<b>MMR</b> <b>Measles, Mumps, Rubella</b>	Two doses of Measles, Mumps, and Rubella (MMR) vaccine (at least 4 weeks apart) are required <b>or</b> laboratory evidence (titer) of immunity.
3	<b>Polio</b>	Three doses of vaccine recommended. If more than three were received, list the last three doses and dates. Please indicate type of vaccine received if known: Oral Polio Vaccine (OPV) or Inactive Polio Vaccine (IPV)
4	<b>Tetanus/Diphtheria/Pertussis (Tdap)</b>	One dose is required and expires after 10 years. A Td booster is required every 10 years after the TDAP has expired.
5	<b>Varicella (Chicken Pox)</b>	Two doses of varicella vaccine (at least 4 weeks apart) are required <b>or</b> laboratory evidence (titer) of immunity.
6	<b>Tuberculin Test (PPD)</b>  <b>To be completed on or after July 29, 2024</b>	<p>The two-step Mantoux PPD vaccinations are administered 1-3 weeks apart and each vaccination must be read within 48-72 hours after administered. Testing should be completed on or after July 29, 2024 and will be required annually while enrolled. If a positive PPD is received – adhere to CDC guidelines.</p> <p>Past positive patients should provide documentation of past positive testing, treatment documentation and a T-SPOT or QuantiFERON-TB Gold antigen test indicating that the patient is free of TB infection. Testing should be completed on or after July 27, 2025 and will be required annually while enrolled.</p> <p>Foreign born patients who received the BCG vaccine as a child should not complete the Tuberculosis Test (PPD) 2 step Mantoux because the BCG vaccine can provide a false positive. The CDC recommends the completion of either a T-SPOT or QuantiFERON-TB Gold antigen test. Testing should be completed on or after July 27, 2025 and will be required annually while enrolled.</p>

Immunization of Health Care Workers: recommendations of the Advisory Committee on Immunization Practices (ACIP) and the Hospital Infection Control Practices Advisory Committee (HICPAC). MMWR 1997: 46 (RR-18). The complete guidelines are available on the line at <http://www.cdc.gov/mmwr/preview/mmwrhtml/00050577.htm>.

KEEP A **COPY** OF THE **COMPLETED** IMMUNIZATION RECORD FORM FOR YOUR RECORDS AND UPLOAD THE **ORIGINAL** VERSION TO CORE.

## IMMUNIZATION POLICY

Students on rotations and or clerkships in a health care facility are at higher risk than the general population for acquiring communicable disease such as measles, mumps, rubella, chicken pox, and tuberculosis. A pharmacy candidate who has one of these diseases may, in turn, infect other personnel and patients. Such infections established in any health care facility are serious in their potential for medical and possible legal complications. Prior to enrollment in the College of Pharmacy, students are required to obtain a history of their immunizations and vaccinations. Documentation of immunizations and vaccinations must be provided by written documentation of a health care provider (physician, nurse, or pharmacist), and must include the type of immunization/vaccination received, the date, and the signature of the health care provider who administered the immunization/vaccination.

If immunization records are not available, candidates may meet these requirements by submitting serologic confirmation of immunity (Titers) for hepatitis B, mumps, measles, rubella, varicella or receive repeated immunizations for these diseases.

Candidates not meeting these requirements will not be allowed to participate in rotations and or clerkships or any course that requires patient care. Failure to obtain required immunizations may lead to failure of a course. During registration periods, all students are required to have current health records in order to be allowed to register. Holds are placed on the student record when a student health record is not current.

### Religious Exemption:

Any student who objects on the grounds that administration of immunizing agents conflicts with his or her religious tenets or practices shall be exempt from the immunization requirements unless an emergency or epidemic of disease has been declared by the Board of Health. An affidavit of religious exemption must be submitted on a Certificate of Religious Exemption (Form CRE-1) which may be obtained at the Virginia Department of Health's website at [https://www.vdh.virginia.gov/content/uploads/sites/11/2016/04/cre\\_1.pdf](https://www.vdh.virginia.gov/content/uploads/sites/11/2016/04/cre_1.pdf) or any local health department.
